Profile

I am a dedicated and detail-oriented Frontend Software Developer with a strong background in building responsive web applications. My passion for continuous learning drives me to stay updated with the latest industry trends and technologies. I thrive in collaborative environments, working effectively with cross-functional teams to turn innovative ideas into reality. I aim to create intuitive and engaging user interface design. I seek to leverage my technical expertise and problem-solving experiences while maximizing performance and accessibility in every project I undertake.

Employment

Software Engineer

Jan 2023 - Present

Q3Technologies, Gurugram

- Served as senior developer, mentoring junior engineers and driving technical excellence across the team.
- Conducted code reviews and provided constructive feedback to peers to enhance code quality and team performance.
- Work closely with back-end developers to integrate APIs and services into the front-end.
- Ensure smooth data flow between the front-end and back-end systems for real-time updates and accurate information.
- Build and maintain robust and scalable web applications using Angular.
- Develop reusable Angular components and services to streamline development processes.
- Implement state management solutions and handle complex business logic within Angular applications.
- Optimize Angular applications for performance and scalability, including techniques such as lazy loading and code splitting.
- Collaborated with design teams to translate mockups into fully functional web applications using Angular and CSS.

Software Engineer

Jul 2022 - Dec 2022

Simplilearn, Bangalore

- Develop and maintain user interfaces using HTML, CSS, and Angular to ensure a seamless and engaging user experience.
- Collaborated with cross-functional teams to define project requirements and deliver high-quality front-end solutions integrating with back-end services.
- Write clean, efficient, and maintainable JavaScript code to add interactivity and dynamic features to web applications.
- Optimize web page load times and performance through efficient coding practices and by implementing best practices for resource management.
- Work closely with designers, UX/UI experts, and back-end developers to ensure cohesive project development.

Frontend Developer

Jun 2021 - Jul 2022

Cartesian Consulting, Bangalore

- Develop and maintain user interfaces using HTML, CSS, and JavaScript to ensure a seamless and engaging user experience.
- Write clean, efficient, and maintainable JavaScript code to add interactivity and dynamic features to web applications.
- Utilize modern JavaScript frameworks and libraries to enhance functionality and streamline development.
- Optimize web page load times and performance through efficient coding

Hobbies

- Learning new technology
- Surfing internets
- Watching web-series
- Playing games

Projects

- [Gomedii.com](#) Design and Developed By Using Angular.
